

Working with stakeholders in Skive Municipality

19.05.2021

Organizing around green biorefining in Skive

Tager udgangspunkt i 3 forskellige opbygninger:

- Asumgaard
 - Landmandsejet
- GreenLab Skive
 - Energifællesskab i A/S form
- Vinkelbioenergi
 - Privatejet
- An already developed sektor via biogas and existing actors

The Municipal focus

- Setting the table and facilitating cross-stakeholder events and meetings within common areas of focus – for mutual benefit

- Being transparent about the municipal priorities and knowledge
 - Area use and plans for the municipal geography
 - GreenLab Skive (from municipal vision to private company → long haul stakeholder management)
 - Involve stakeholders in the municipal priorities, agendas and challenges
 - Rules and framework (rammevilkår), which affect activities within the municipality
 - Water environment
 - CO2-emissions
 - and more
 - Political priorities
 - Development and growth focus – for instance bioeconomy, ensuring survival of agricultural sector

Municipal stakeholdermanagement

- People (Erik Kolding, a.o.)
 - With the ability to look beyond the local context via
- Relations (based facilitation and knowledgesharing beyond the local municipal limits → (crossregional, national, etc.))
- Dynamic approach to facilitation – what do the stakeholders need to act
- Being aware of municipal limitations and options

Next step

- Securing/anchoring existing effort
 - In Energifonden Skive (GreenLab Skive + future projects)
 - In our municipal organisation (departments and people)
 - In new/derivative (afledte) projects (like/from Green Valleys)
